

Introduction to Chemistry

Key terms and definitions

Task:

Your task is to produce a document that defines the key terms or concepts for this unit introducing Chemistry. The list below details the terms I would like you to define as part of your task;

- | | | |
|-----------|------------|------------|
| ✓ Atom | ✓ electron | ✓ compound |
| ✓ Proton | ✓ element | ✓ ion |
| ✓ Neutron | ✓ molecule | ✓ isotope |

Instructions:

- *Your finished work can be produce either in an electronic format or by hand.*
- *Each definition should be in your own words.*
- *Use illustrations or technical diagrams to complement your definitions. Try to refer to your diagrams as part of your definition.*
- *Consider the formatting of your page to provide an easy to read aesthetic and avoid empty space.*
- *Your finished work should be collated in your display folder. I will look at your finished work when we return to class.*

Good luck
